

Inspection Date:

Playground Equipment

Inspection Areas	Specific hazards / elements to inspect	Yes, No or N/A	If 'No', what controls / actions are being taken to fix the risk?	Risk control due date	Completed
Structural & mechanical	Structural components are free from damage, rust and corrosion				
	Protective coatings and equipment surfaces are free from damage and wear				
	Rails, bolts and other protruding sharp objects are covered with end caps				
	Moving parts and bearings are well greased/ lubricated				
	Bolts, nuts, screws and fastening pins are in place and secure				
	Handrails and steps are free from damage and are slip resistant				
Flexible Shade Sails	Shade sail and structural components are in good condition, free from damage, rust and corrosion				
	Bolts, nuts and screws are secure and in good condition and free from damage, rust and corrosion				
	Access points to the shade sail have been restricted (e.g. tree branches removed)				
	Worksafe Maintenance and Inspection Recommendation: Have the shade sail system regularly monitored and inspected by a competent person to ensure that it is maintained in a safe condition throughout its life [WorkSAfe Victoria Collapse of fabric shade sail support structures]				
Site conditions	Playground equipment fall zones contains at least 30cm of loose soft fall or an appropriate absorbent ground surface (e.g. rubberised compound)				
	Water does not pool in wet weather conditions				
	Sandpits are clean and free from foreign objects				
	Ground surfaces are level and free of trip hazards (i.e. pot holes, roots, cracks, etc.)				
Lighting	Lighting is appropriate for the tasks being performed/security requirements and is good working order (e.g. blown globes)				
Design and Layout	Entry and exit points are free of obstacles and collision risks				
	All exits gates have 'child proof' catches in working order
